Senior Product Designer — AI & Intelligent Systems

AI Product Design · Human-in-the-Loop Systems · Intelligent Workflows · Decision Support

Senior Product Designer with 8+ years of experience designing complex digital products, with recent work focused on intelligent, automation-assisted, and human-in-the-loop experiences. I translate complex business logic, system behavior, and user needs into clear product experiences that help people review, understand, and act on system-generated outcomes.

Experienced across B2B SaaS, analytics, enterprise workflows, and emerging AI products—from discovery and research through interaction design, prototyping, validation, and delivery. Particularly interested in AI products where trust, explainability, human judgment, and workflow redesign are central to the experience.

AI & PRODUCT DESIGN EXPERTISE

- End-to-End Product Design (0→1, 1→N)
- AI-Assisted & Automation Workflows
- AI Product Design & Intelligent UX
- Data-Informed Design & Experimentation
- Product Discovery & Problem Framing
- Human-in-the-Loop Systems

PROFESSIONAL EXPERIENCE

Overplay Games

Senior Product Designer

Remote (New York, United States)

→ Oct 2022 - Mar 2026

- Led end-to-end design of mobile and web products, shaping complex, stateful user workflows from problem framing through production delivery.
- Designed and optimized automation-assisted user flows, introducing system-driven interactions that reduced manual effort and improved task completion rates.
- Defined interaction patterns for human-in-the-loop systems, enabling users to review, adjust, and override system-generated outcomes where needed.
- Partnered with product and engineering to translate business logic into clear, actionable interfaces, ensuring transparency in system behavior and decision-making.
- Established research and analytics practices to evaluate user behavior, system performance, and interaction outcomes, connecting UX improvements to engagement, retention, and ROI.
- Built rapid, high-fidelity prototypes simulating dynamic and conditional flows, enabling early validation of complex interactions before implementation.
- Contributed to and evolved a scalable design system, supporting consistency across multi-state experiences and accelerating product development.

Phocas Software

Senior Product Designer

Christchurch, New Zealand

→ Aug 2020 - Sep 2022

- Partnered closely with Product Managers and the VP of Design to solve complex product challenges within a subscription-based SaaS platform serving analytics, financial planning, and business intelligence users.
- Designed and optimized product experiences that supported customer adoption, engagement, and long-term retention, helping users realize value from the platform throughout their lifecycle.
- Collaborated with cross-functional teams to improve feature discoverability, usability, and workflow efficiency across desktop and mobile experiences.
- Conducted qualitative user research, usability testing, and prototype validation to inform product decisions and reduce friction in critical user journeys.
- Facilitated design thinking workshops to align stakeholders around user needs, business goals, and solution strategies.

Qotient

Senior Product Designer

Auckland, New Zealand

→ Sep 2019 – Aug 2020

- Partnered with Product Managers and engineering to design scalable product experiences across complex initiatives.
- Applied UX methodologies including discovery, research, usability testing, and iterative solution development.
- Designed and piloted experimental UX processes to support adoption and growth across complex assignments.
- Established the foundation for a scalable design system supporting desktop and mobile products.

Visa

Senior UX Designer

Auckland, New Zealand

→ Oct 2018 – Sep 2019

- Collaborated with cross-functional teams on complex enterprise initiatives within regulated environments.
- Developed research plans, documentation, and hypothesis frameworks to guide evidence-based design decisions.
- Planned and facilitated user research and usability testing to uncover mental models, interaction patterns, and user flows.
- Applied experimental design approaches to support adoption and scaling of UX practices across multiple teams.

ProcessMaker

Product Designer

New York City Metropolitan Area

→ Oct 2015 - Oct 2018

- Applied Design of Experiments (DOE) and empathic design methodologies to validate assumptions and inform product decisions.
- Led user learning sessions, rapid prototyping, and usability testing for complex B2B workflow products.
- Designed end-to-end UX solutions improving interaction patterns, task clarity, and user efficiency.
- Executed UI design defining visual hierarchy, interaction patterns, and transitions aligned with evolving brand identity.
- Collaborated closely with product and engineering teams to balance usability, feasibility, and business requirements.

o2o Interactive
Senior UX/UI Designer
Greater Denver Area
→ Mar 2013 – Feb 2015

- Worked as a UX/UI consultant delivering digital products across mobile, tablet, and desktop platforms in an agency environment.
- Led UX research and UI design for multiple international client projects across the US, New Zealand, Brazil, and Colombia.
- Designed end-to-end user experiences from discovery through execution, ensuring feasibility and scalability.

Yellow New Zealand
Prototype & Trial Manager
Auckland, New Zealand
→ Jul 2012 – Feb 2013

- Led innovation and early-stage experimentation initiatives focused on problem exploration and concept validation.
- Facilitated ideation and design workshops to generate, test, and refine product ideas.
- Supported rapid prototyping and trial efforts to assess feasibility and user value.

Yellow New Zealand
Lead Web Designer
Auckland, New Zealand
→ Jan 2012 – Jun 2012

- Led UX and usability design for mobile applications and web-based platforms.
- Designed and implemented responsive web experiences across devices.
- Applied principles such as progressive enhancement and graceful degradation.

Gopher Directory
Frontend Developer
Auckland, New Zealand
→ Mar 2011 – Dec 2011

- Designed and implemented user interfaces for internal web-based applications with a strong focus on usability.
- Built responsive front-end solutions supporting mobile and desktop experiences.
- Collaborated with stakeholders to translate UX requirements into feasible implementations.

Web Designer & Developer (Freelance)
Auckland, New Zealand
→ Sep 2010 – Feb 2011

- Worked directly with clients to define aesthetic and functional requirements aligned with business goals.
- Planned project timelines and managed delivery milestones.
- Designed, prototyped, and delivered complete websites end-to-end.

Zestmedia Ltd

Web Designer & Developer

Auckland, New Zealand

→ Aug 2008 – Sep 2010

- Delivered web design and front-end development for client-facing projects.
- Planned and coordinated project delivery.
- Led and supported a small design team.

3 Legged Dog Design

Web Designer

Auckland, New Zealand

→ Jul 2007 – Jul 2008

- Delivered graphic and web design for client projects.
- Designed and built early digital experiences combining visual design and front-end implementation.

KEY ACHIEVEMENTS

- Finalist, SXSW Film & TV Awards — Innovation Category (Overplay Games, 2024)
- Contributor to Inc. 5000 company, three-year sales growth of 155% (ProcessMaker)

EDUCATION

- Bachelor's Degree — Design & Visual Communications
  Caldas University · 2005

CERTIFICATIONS

- UX Certification — Nielsen Norman Group (2020)
- Interaction Design Foundation — User-Centered Design
- Selected coursework: DesignOps, UX Leadership, Persuasive UX (LinkedIn Learning)
